Summary

Computer Science Engineering graduate with MBA in Systems Management and experience in software development, API integration, and cybersecurity. Skilled in Python, Java, REST APIs, MuleSoft, Flask, and problem solving. Seeking opportunities to grow as a software developer.

Skills

Languages: Python, Java

Technologies: MuleSoft, REST APIs, SQLite, Flask, Git

Soft Skills: Communication, Teamwork, Problem Solving, Decision Making

Education

MBA in Systems Management	2023 – 2025
University of Madras	71.23% (<i>Result Declared in 2026</i>)
Bachelor of Engineering (B.E.) in Computer Science	
Panimalar Institute of Technology	2018 – 2022
CGPA: 8.88	
HSC, Kaligi Ranganathan Montford Matric School	2017 – 2018
Score: 90%	
ICSE, Doveton Group Of Schools	2015 – 2016
Score: 77%	

Experience

Cybersecurity Intern – AICL

- Assisted with system monitoring and basic vulnerability assessments.
- Learned fundamentals of data security and documentation practices.

MuleSoft Developer (Training)

- Built integration flows using Mule 4 and Anypoint Platform.
- Worked with REST APIs, API-led connectivity, and error handling.

Projects

Phishing Website Detector (Final Year Project)

Built a Flask-based ML tool to detect phishing websites in real-time.

Movie Bucket List

Python + SQLite application to manage and store favorite movies.

MP3 Converter

Python tool using moviepy to convert videos into MP3 format.

Portfolio Website

Designed and deployed a personal site to showcase projects and skills.

Certifications

- MuleSoft Certified Developer – Level 1
- Cybersecurity Training – AICL
- Technical Support Fundamentals – Coursera
